Einleitung Introduction

Aluminium: Die Systemprofile ALURON werden aus hochwertigen Aluminium-Konstruktionslegierungen gepresst, die höchsten Qualitätsnormen erfüllen. Die Profilverstellung erfolgt in Anlehnung an die neuesten DIN-Richtlinien.

Aluminium: ALURON aluminium profiles are pressed from structural alloys which fulfilling highest quality norms. The production of profiles in limited tolerances is a guarantee of the dimension repeatability.

Eloxierung: Beim Eloxieren wird die Oberfläche durch elektrolytische Bildung von Schutzoxiden veredelt. Dadurch erhält man eine sehr hohe Korrosionsbeständigkeit bei gleichzeitiger Erhöhung der mechanischen Eigenschaften.

Standardfarben Eloxal: siehe Seite 4

The anodizing: The anodizing is a process of aluminium surface refining based on electrolytic production of protective oxides. It results with very high corrosion resistance and improvement of mechanical resistance. The standard colours anodized: see page 4

Pulverbeschichtung: Perfekte chemische Oberflächenvorbehandlung nach Qualicoat garantiert eine sehr gute Haftung und Dauerhaftigkeit der Beschichtung.

Standardfarben: siehe Seite 4

Wir bieten jedoch die Profile auch in jeder weiteren Farbe der RAL-Karte, NCS, Holzdekor auf Anfrage an.

The powder painting: The perfect preparation of the coating include full chemical pretreatment according to Qualicoat. The process warrants perfect adhesion and coating durability for many years.

The standard colours: see page 4

On inquiry we offer powder painting in every RAL, NCS colours or wood imitated structure.

Kunststoffzubehör: Neue Generationen der eingesetzten Rohstoffe sorgen für eine verbesserte Temperatur-, UV- und Alterungsbeständigkeit.

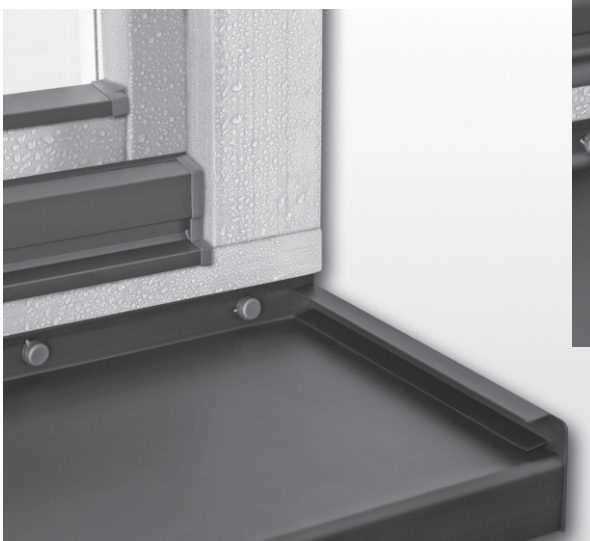

Standardfarben: siehe Seite 4.

Sonderfarben auf Anfrage möglich.

End plugs: The end plugs are performed from new generation material with considerably higher UV and age-resistances.

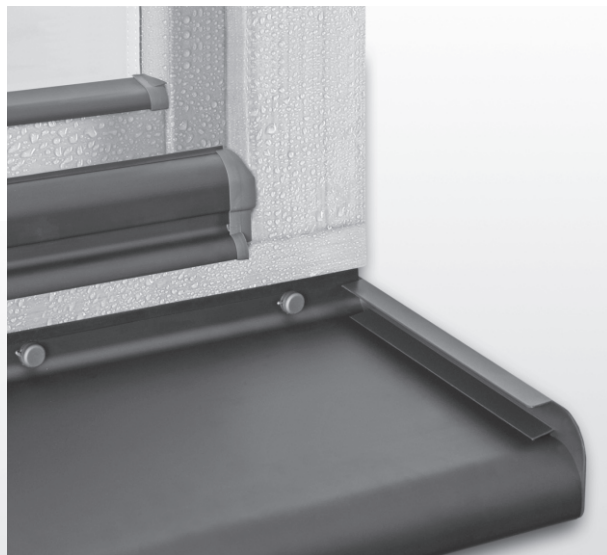

The standard colours: see page 4

On inquiry we offer the end plugs in every RAL colour.
